

Nothing But Primes

by misof

Rules

Standard Sudoku rules apply.

Each cage surrounds a prime number (*written top-to-bottom in vertical cages, left-to-right in horizontal cages*).

Puzzle

Helpful notes

The primes from 1 to 100:

2, 3, 5, 7, 11, 13, 17, 19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89, and 97.

You'll need to do a bit of math here and there, but there is a solve path that never needs anything too ugly.

When solving, you may ignore the arrows to the left of the grid. If you downloaded this puzzle from logic-masters.de, the arrows show you the rows you should enter as the solution code.

If you prefer solving online, the puzzle is available at <https://sudokupad.app/xmk2mlh17y>
